

Mother's Day: Pop-up Flower Card

What you will need:

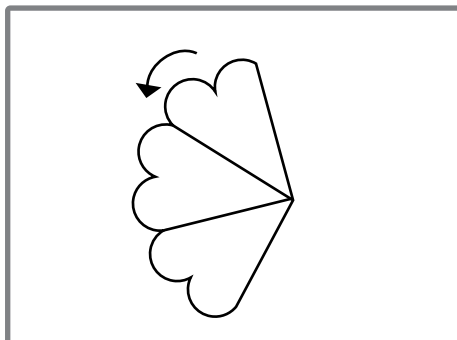

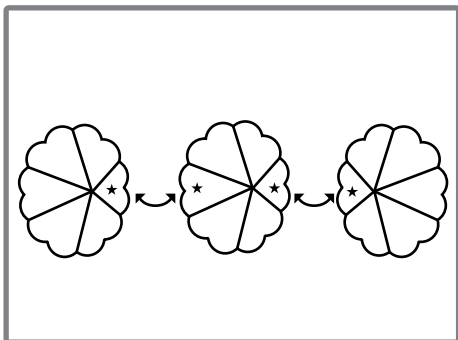

- Glue
- Scissors

1) Colour in the flowers on page 3, and cut them out carefully following the dotted lines. Or you can use the flowers as templates instead if you want to use card or tissue paper to make your flowers.

2) Fold along each line of the flowers.

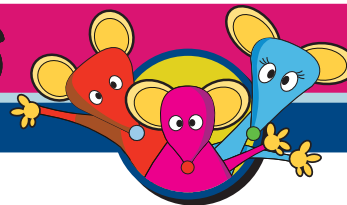

3) Glue petal 1 to petal 2 to make a cone shape. Do this for each flower.

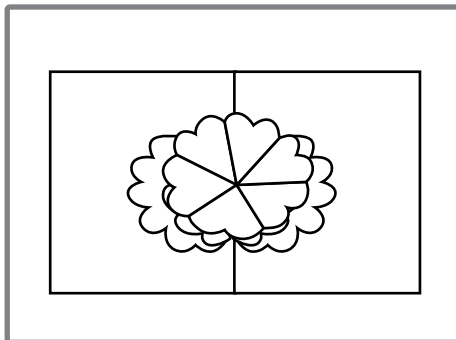

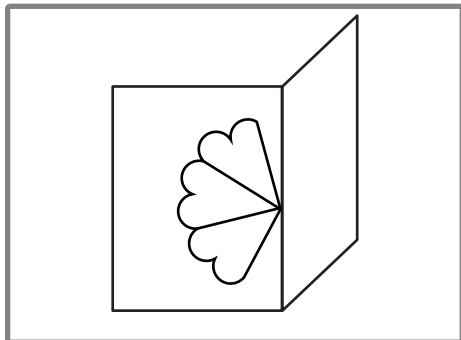

4) Next you need to attach all 3 flowers together. You do this by gluing one petal from one flower to one petal of another flower as in the picture above illustrated by the stars.

5) Once the 3 flowers are glued together, gently fold them in half giving you a shape as in the picture above.

6) Cut out the card template on page 4 carefully along the dotted line. You can glue this template to your own coloured card if you want to.

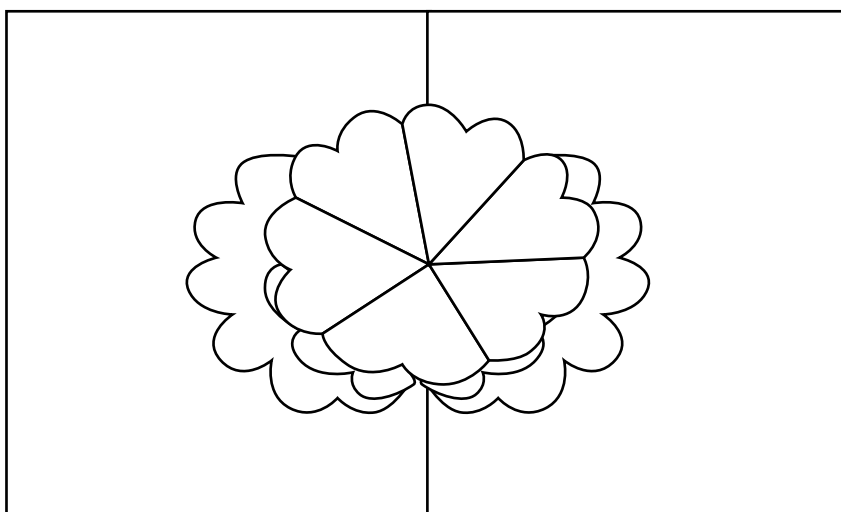

Mother's Day: Pop-up Flower Card

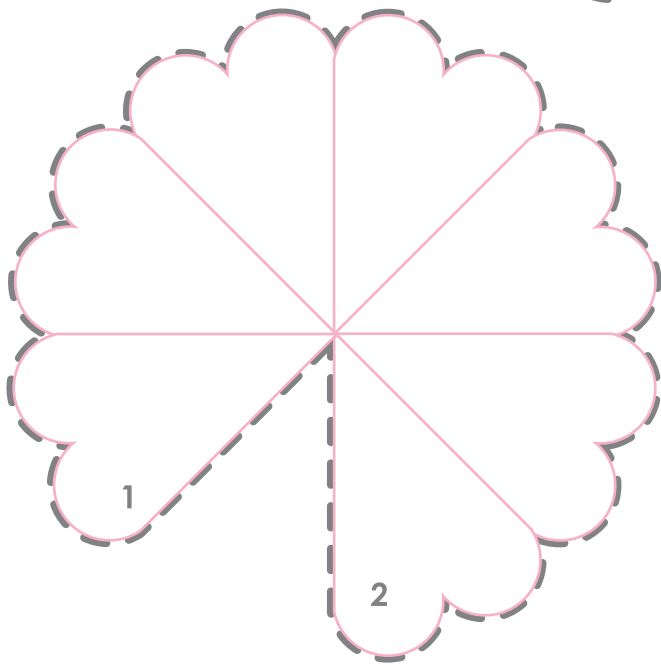

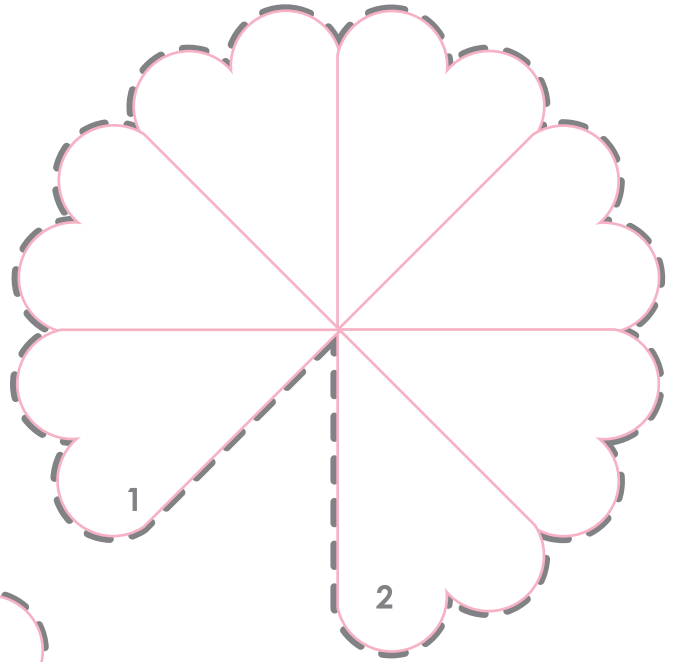

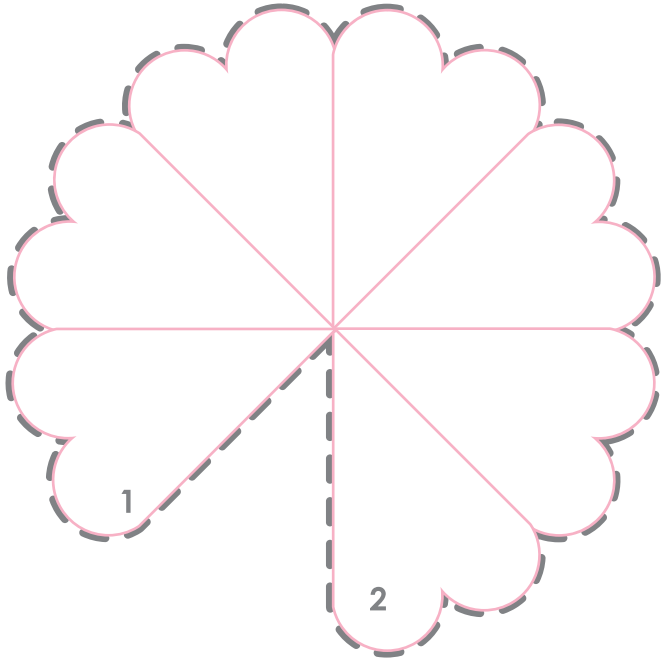

7) Inside the card place the folded flowers from step 5 (see image above).
Glue one side of the flowers to one side of the card.

8) Put some glue on the other side of the flowers and stick to the other side of the card. Close the card and put an object on top such as a book to help the glue to stick the flowers to the card properly.

9) Once the glue is dry, your card is ready. Open your card and the flowers will pop out of the middle!

9) Write a message inside your card for your mum!
