

# Make your own space picture

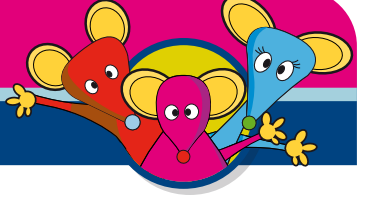

Colour in the pictures below and cut them out. Arrange the pictures on the background (page 2) to make your very own space picture. Don't forget to use bright colours when colouring in so that they stand out against the background. You can keep rearranging the pictures to make different space scenes. If you create one that you really like, glue the pictures in place and frame it. This would make an ideal Christmas gift for someone special.

Inspiring young minds...
